

GFI Unlimited:
Changing the dynamics of software
for you and your SMB customers

GFI Software™

At GFI, we know that the technology needs of small and medium-sized businesses (SMBs) change daily. It's increasingly complex for your customers to operate effectively, and to attract and retain business. To navigate these changes, they rely on more and more business software - which they must acquire with increasingly tight budgets, and through a complicated vendor landscape.

What if you could unleash unlimited access to all the business software your customers need, when they need it, for one predictable, low cost? That's GFI Unlimited.

GFI Unlimited enables SMB owners to lose the license. With GFI Unlimited, your customers can lock-in a Netflix-like subscription to all the software GFI has - and will ever have. Most importantly, it creates a powerfully simple way for you to become an irreplaceable ally in this increasingly complex SMB software vendor landscape.

Why GFI Unlimited?

As the world of SMB software continues to evolve, it's more important than ever for partners to focus on customer retention by delivering more value to existing customers. GFI Unlimited is a powerful program that lets you shift the dynamics with your customers, offering them a comprehensive path to accessing all the software they need, while creating the depth of relationship that keeps customers coming back.

Even more compelling, the real power in GFI Unlimited is how fast it's expanding. As our product catalog continues to grow faster than any technology provider anywhere, so does GFI Unlimited - and with that, the scale and flexibility of what you can offer to your customers.

How does GFI Unlimited work?

GFI Unlimited is game-changing in its simplicity, revolutionary in its value, and drives an unparalleled alliance with your customers.

- **One subscription unlocks the entire catalog** - customers license a subscription to GFI Unlimited on a per user or per unit basis. A company has 20 users? That's 20 subscriptions. But, here's the revolutionary idea - now, customers can use any of the software in GFI Unlimited at the same capacity. One subscription covers it all.
- **Price disruptive, flexible subscriptions** - subscriptions are priced at \$24 per user per year - that's just \$2 per user per month! - can be licensed for 12, 24, or 36 months. When customers sign-up for longer subscription terms, they save even more.
- **Business-proven, full-featured software** - the software included in GFI Unlimited is the same great software you already know. Full-featured SMB software - ready to deploy today.

What's included in GFI Unlimited?

GFI Unlimited includes our comprehensive - and always growing - suite of network security and communications solutions. Currently, GFI Unlimited includes:
