

Simplifying Microsoft 365 Security for Businesses and MSPs

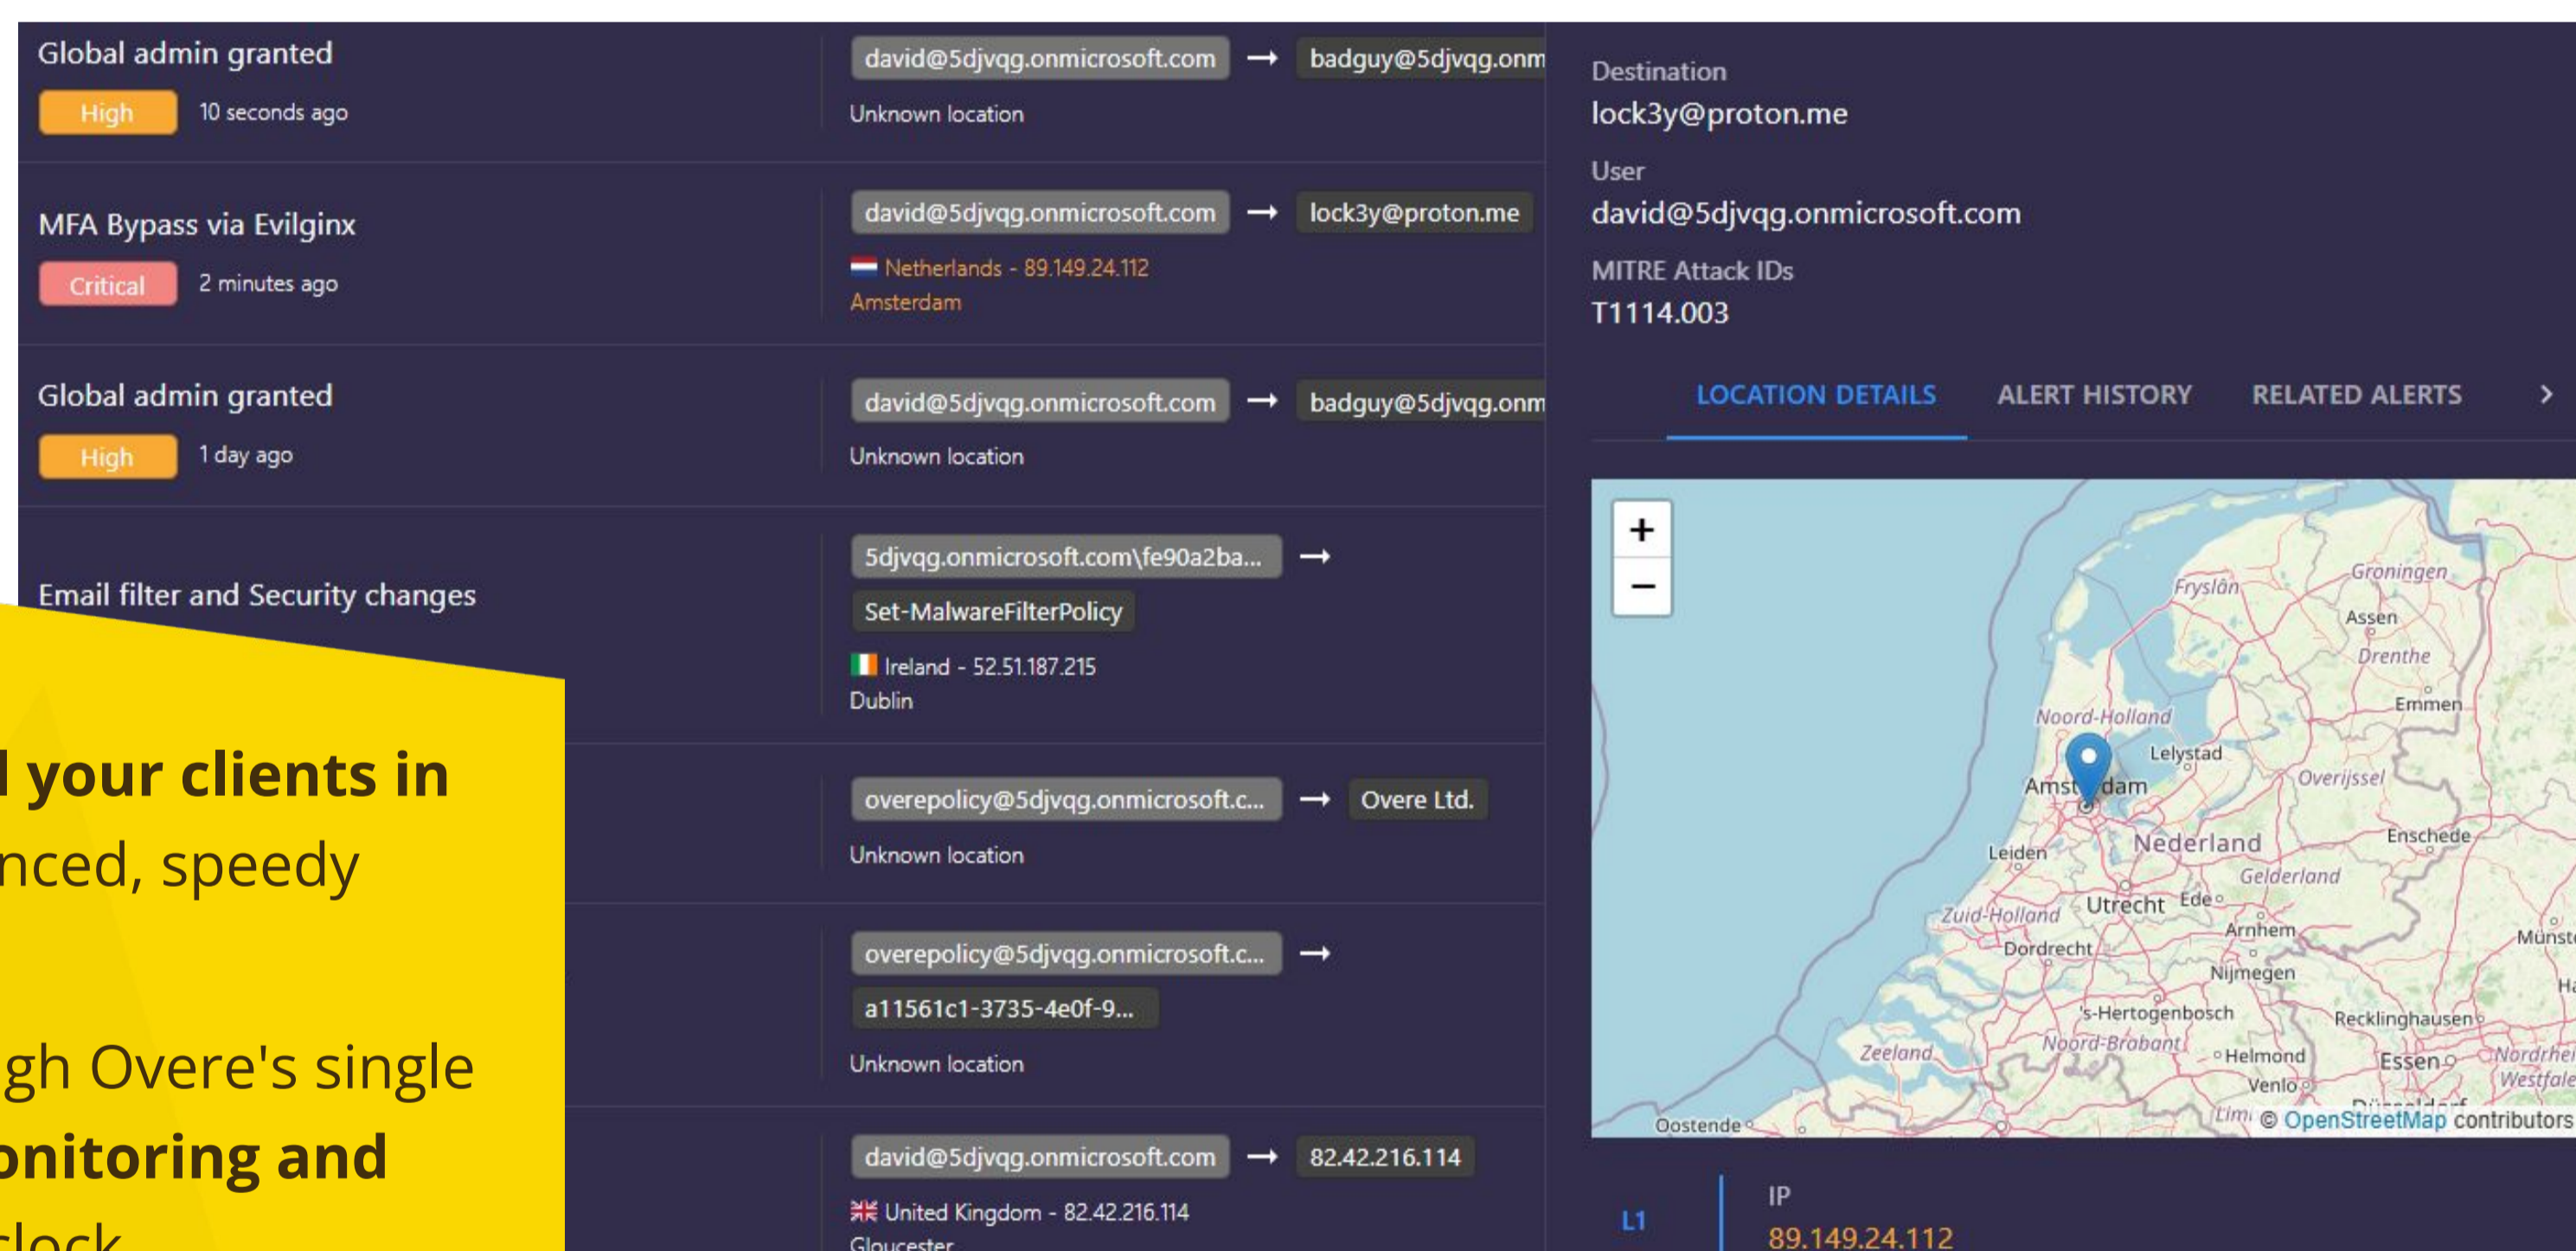

Secure Microsoft 365. Automate Compliance. Stay Ahead of Threats.

Protect Your SaaS, Simplify Security

In today's digital landscape, the threat to SaaS applications has surpassed traditional endpoints, **with over six SaaS-based threats for every endpoint threat**. Overe is a purpose-built **Cloud Detection and Response platform** tailored for Managed Service Providers (MSPs) to not only safeguard their clients' cloud environments effortlessly but also to unlock new revenue streams through value-added services. Equipped with **real-time threat detection, automated compliance**, and actionable insights, Overe empowers MSPs to ensure their clients' SaaS ecosystems are **secure, compliant, and operationally efficient**.

KEY BENEFITS

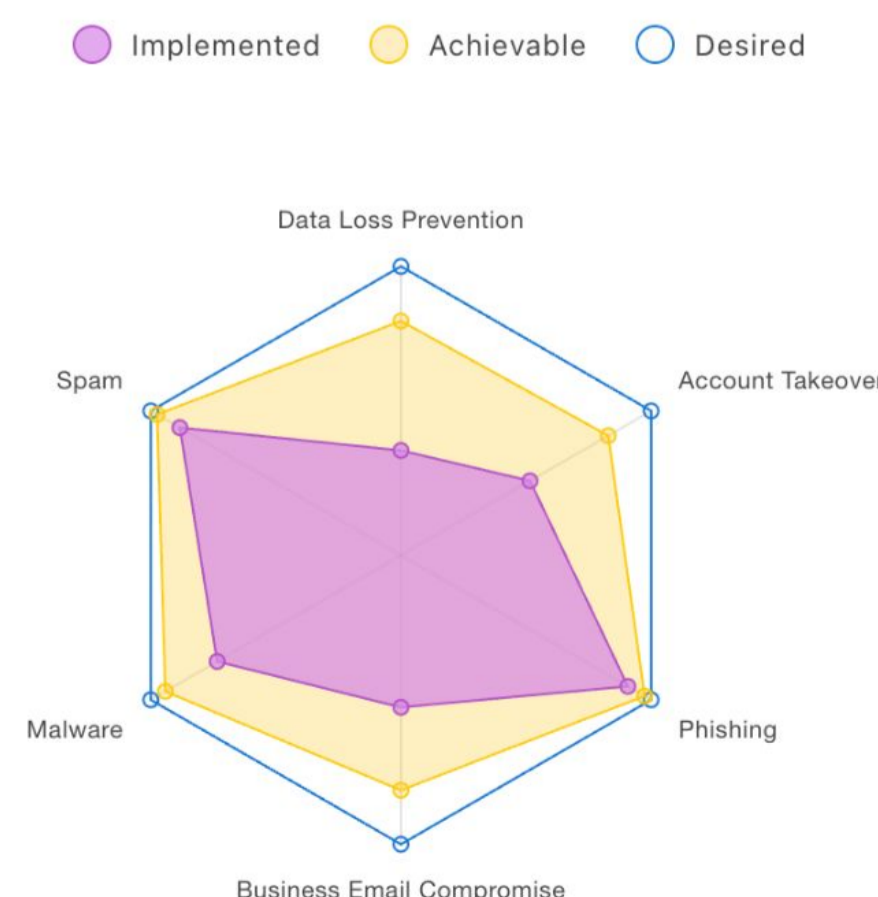

- **Quantify SaaS risks across all your clients in seconds**, not weeks, with advanced, speedy scanners.
- **Manage all your clients** through Overe's single portal, offering **continuous monitoring and real-time alerts**, even off the clock
- **Provide expert-level security without the expert-level costs**. Overe's affordable solutions fill the skills gap and fit within your budget
- **Proactive scanning and monitoring tools alerts to any anomalies**, helping spot breaches before they escalate.
- **Automatically** implement not just **best practice policies** but also **optimized security configurations** tailored to each client's needs.

Microsoft Integration

Security Controls Assessment (Quick Scan)

We've detected **7 security controls** that your company can't fulfill with your current Microsoft license. Review the graph below to understand the areas where you can't reach the desired level of protection.

Deep Scan

Instantly identify key risks in your SaaS environment with identities, mailboxes, connected apps, and much more to come.

Get a quick overview of potential vulnerabilities, their status, and action and enhance security.

Requested	Status

* Scans are currently performed on-demand, with results not automatically sent. Automatic saving and notifications will be implemented in the future.

Simplifying Microsoft 365 Security for Businesses and MSPs

Secure Microsoft 365. Automate Compliance. Stay Ahead of Threats.

KEY CAPABILITIES

Elevating your SaaS Security Strategy from Awareness to Action

Overe is built on four fundamental pillars: **Assess, Harden, Monitor, and Respond**. This integrated approach ensures robust, seamless protection across **identifying vulnerabilities, strengthening defenses, continuous monitoring, and immediate threat response**. Equip your team with advanced tools to protect, detect, and swiftly react, maintaining a secure operational environment.

COMPLIANCE ALIGNMENT

Overe aligns with leading cybersecurity frameworks to help MSPs deliver measurable security outcomes.

Through mappings to **NIST CSF 2.0, CIS Controls v8.1, and in-product CIS Microsoft 365 Benchmarks**

Overe enables partners to **assess posture, enforce policy, and remediate risk** — especially in cloud and SaaS environments often **overlooked by traditional tools**.
